

UK Specialists in Solar Energy

Solar Microgeneration Limited (SML) specialise in the design, supply and installation of solar water heating and photovoltaic systems for domestic, commercial and public sector buildings throughout the UK.

The SML Partnership

SML was formed as a joint venture by three of the UK's leading solar energy companies, Filsol Solar Limited, SolarTech Limited and Southern Solar Limited. With over 25 years of experience in the manufacture, design, supply and installation of high efficiency solar energy technologies, the SML partnership offers high quality, cost effective and truly focused solutions with a nationwide delivery capability.

Solar Water Heating

The SML solar water heating solution is based on the Filsol flat plate collector which is manufactured at Filsol Solar's factory in South Wales. Based on a high efficiency stainless steel absorber plate, the Filsol collector is widely regarded as one of the most effective and long lasting solar collectors available.

Solar Photovoltaic (PV)

SML also design, supply and install a range of solar photovoltaic (PV) systems using proven, high quality technology supplied by leading international PV companies including Sharp and Naps Systems.

Our Capabilities

Our success is founded on working closely with clients, developers, architects, M&E contractors and design consultants to provide effective solutions and a fully comprehensive service, including:

- Feasibility studies and advice
- In-house system design and specification
- Project management
- Nationwide installer network
- Quality management system
- Health and safety compliance
- Maintenance and aftercare support
